

TEKSO!

Technology Solutions

Smarter Solutions, Brighter Future

PLC Panels: Design, Programming & Commissioning:

We design, program, and commission PLC (Siemens, Schneider Electric, Delta) panels for a variety of industrial applications, ensuring optimal control and efficiency.

- * Experienced engineers
- * Custom-tailored solutions
- * Reliable and robust systems

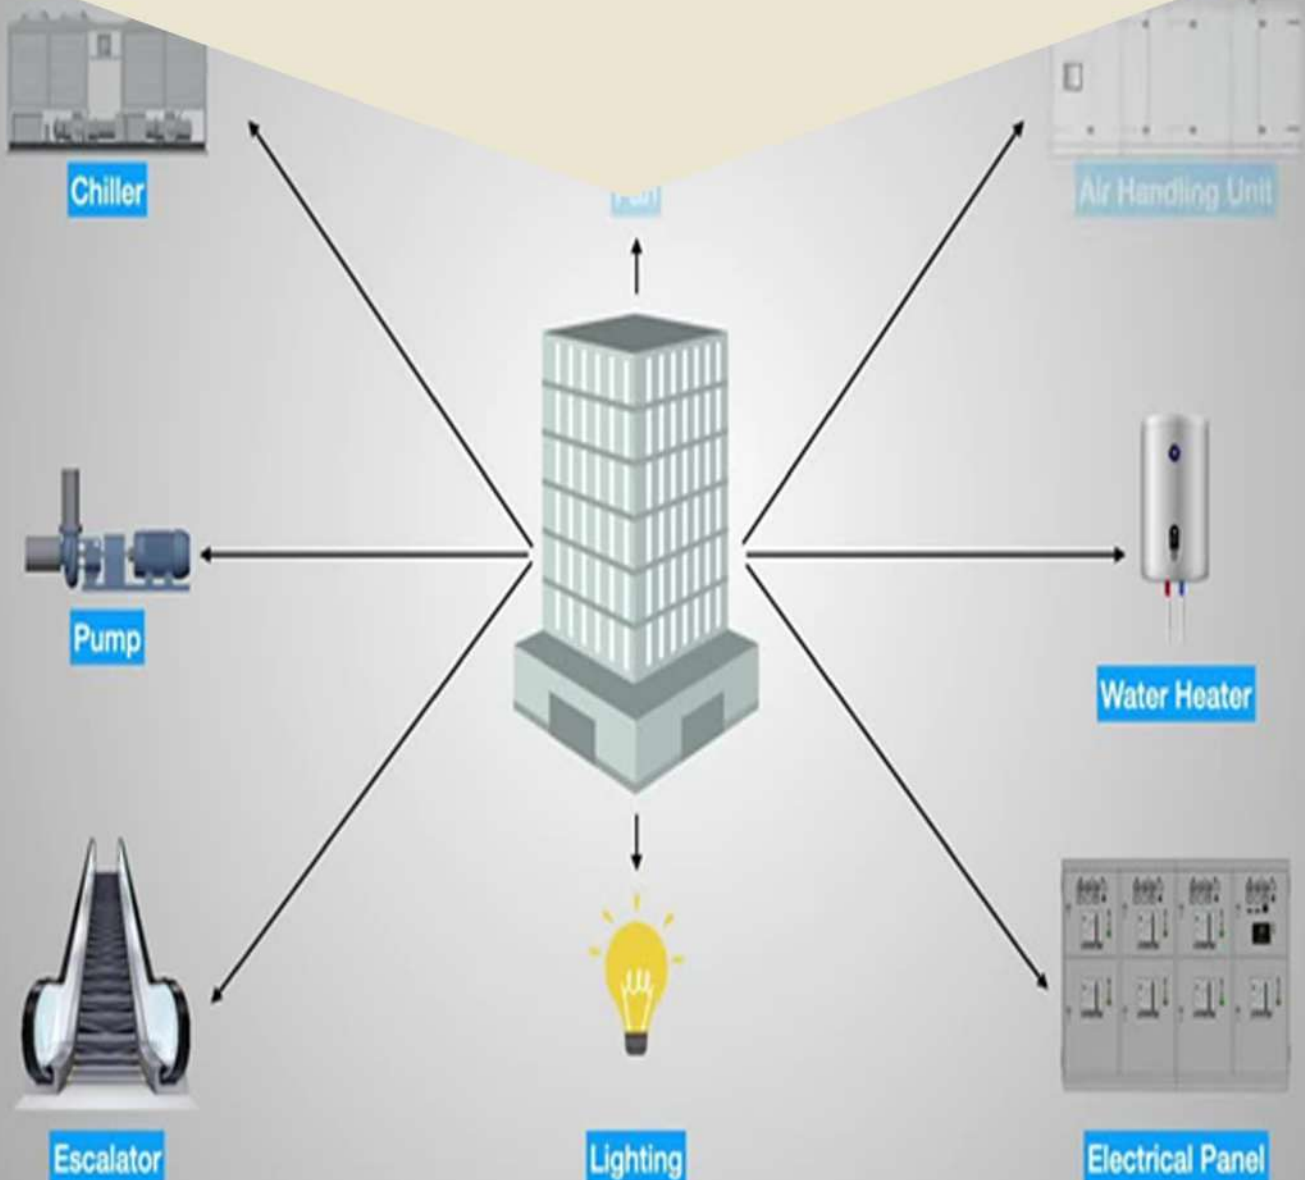

PLC

the core of industrial automation

Building Management Systems: Design, Control & Upgrade

We design, control, and upgrade Building Management Systems (BMS) for improved comfort, energy efficiency, and cost savings. Our services include:

- * HVAC control
- * Lighting control
- * Access control
- * Billing application integration

Sustainable Solutions: Solar Systems

We offer comprehensive solar system solutions, from calculating your energy needs to installation and commissioning.

- * Feasibility studies and system design
- * High-quality equipment installation
- * System commissioning and maintenance

Smart Homes: Design & Installation

Description: Elevate your living experience with our smart home design and installation services. We integrate various devices for:

- * Lighting control
- * Temperature control
- * Security and access control
- * Automated routines
